## Skills

### C#

### SQL

### JavaScript

### HTML/CSS

### C++

### JAVA

### Python

### Kotlin

## Familiar Technologies

### ASP.NET MVC

### Agile Development

### Version Control, GIT

### Test Driven Development

## Projects

### Peak Performance, Senior Project

- Designed and developed web application to improve athlete workout plan by storing workout plans on the cloud through a responsive interface and providing athletes with FitBit watch integration for calories burned tracking.
- As an Agile team, followed Agile Software Development including inception phase, sprint planning, backlog refinement, sprint reviews, stand-ups and retrospectives.

### Race Records, Web App

- Built web application that holds race data using multi-table, relational database.
- Used responsive techniques for web pages.

### Movie Time, Android App

- Android application with user interface similar to Netflix.
- Users may browse TV shows and movies to find what is new, popular, and more.
